### **Introducing GC<sup>3</sup> FloClear Products**

**GC<sup>3</sup> Specialty Chemicals, Inc.**, headquartered in Houston, TX is pleased to announce the introduction of a new, expanded line of enhanced coagulants which deliver improved performance over traditional alternatives, while reducing overall chemical treatment costs in raw water clarification and waste water treatment operations.

The new line covers a wide range of specific gravities and basicities, and includes aluminum and ferric based inorganic coagulants, as well as products blended with organic polymers which work synergistically to reduce overall feed rates while improving flocculation performance.

With the expanded line, it is often possible to replace two or more existing products with one blend, reducing the system complexity and improving clarifier control.

Benefits of the new line over traditional products include:

- Lower turbidity
- Reduced sludge volume
- Improved pH and alkalinity
- Cost savings

**GC<sup>3</sup> FloClear Products** are available in railcar, bulk tank trucks, IBC tote tanks, and drums. Turn-key equipment packages can be specified and provided, allowing customers interested in FloClear technology, the ability to quickly and efficiently test the product in their systems.

Please contact your GC3 representative at 800-306-2970 or visit our website at [www.gc3.com](http://www.gc3.com).

**GC<sup>3</sup> Specialty Chemicals, Inc.** is a full-service specialty chemical company focusing primarily on the power utility market, with treatment programs in place in over 100 units. Separate divisions provide chemical treatment programs and services to the refining, chemical and oil-field industries.
